(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒ Form 40-F ☐

EXPLANATORY NOTE

Ferrovial N.V. (the “Company” or “Ferrovial”) hereby furnishes this Amendment No. 1 on Form 6-K solely to file an updated version of the Investor Presentation included as Exhibit 99.1 to the form 6-K furnished on May 8, 2026 (the “Original Form 6-K”). The update corrects two errors contained in the previous version of the presentation.

The amendments relate to (i) the amount of equity invested by Ferrovial in 407 ETR (slide 27) and (ii) the debt maturity chart for the bonds issued by New Terminal One (“NTO”) (slide 95).

Other than as expressly set forth above, this Form 6-K/A does not, and does not purport to, amend, update, or restate the information in any other item of the Original Form 6-K, or reflect any events that have occurred after the Original Form 6-K was filed.

(6) Average time to maturity calculated as weighted value, based on analyst's consensus as of December 2024. Valuations are based on external (analyst's) assumptions and expectations

High degree of freedom to set prices

ferrovial

(1) This percentage reflects the agreement announced on March 13, 2025, by Ferrovial to acquire up to a 5.06% stake from AtkinsRéalis, considering the exercised put-call option

(2) CPI growth calculated as the average yearly growth of the consumer price index in Canada (2014-2025) and United States (2019-2025), respectively

(3) Total dividends distributed to Ferrovial by 407 ETR: C\$734M (€444M), Texas Managed Lanes: \$338M, I-77: \$37M, and I-66: \$92M.

(4) Non-IFRS financial measure. For the definition and reconciliation to the most comparable IFRS measure, see Alternative Performance Measures in the 2024 Integrated Annual Report, available at [www.ferrovial.com](http://www.ferrovial.com)

# Main highways have shown resilient performance in uncertain scenarios

☒ Needed assets

☒ Pricing flexibility

☒ Growing areas

## 407 ETR

## DFW EXPRESS LANES

## Value creation levers

### ASSET FEATURES THAT DRIVE COMPOUNDING GROWTH IN LONG-TERM CONCESSIONS

#### DERISKING

#### LOWER DISCOUNT RATES

- Ferrovial creates value by reducing project risk over the life of a concession. As construction risk disappears and traffic/financing visibility improves, the discount rate applied to future cash flows decreases, which raises the project's valuation

#### ROLLING FORWARD

#### LARGE CASH FLOWS NEARER IN TIME

- As concessions mature, cash flows that are back-ended naturally move closer in time. This "rolling forward" of the DCF curve increases the net present value of the asset.

A POWERFUL COMPOUNDING UPLIFT IN VALUATION ACROSS LONG-DURATION, BACK-ENDED ASSETS LIKE MANAGED LANES

(1) Discount rate ranges are indicative only and are based on historical examples across the Company's portfolio.

## Robust pipeline and increased P3 interest in the US

### PRIVATE SECTOR KEY TO NARROW THE FUNDING GAP

Population growth in cities & increased congestion leads to new infrastructure project needs

High deficit levels & budgetary constraints provide an opportunity for the private sector to support infrastructure development, freeing up for other uses

89% of US residents projected to live in cities by 2050<sup>(1)</sup>

US airport traffic expected to grow +43% by 2040<sup>(2)</sup>

\$3.7 trillion<sup>(3)</sup> gap in U.S. infrastructure investment for next 10y

PPPs provide a way to mobilize long-term private investment for infrastructure projects, alleviating the need for immediate, large-scale public investment.

ferrovial

### Pipeline

#### 6 PROJECTS

## Selective investments in high-growth sectors & geographies

### Key Investment Criteria

#### Ferrovial's approach:

Leveraging our core engineering & construction capabilities to target selective, disciplined investments in high-growth sectors and geographies

#### Limited capital exposure

- ✓ Determine maximum size of exposure based on careful analysis of unique dynamics of sector or geography

#### Balanced risk-reward

- ✓ Target projects with attractive risk-adjusted returns

#### Timely asset rotation

- ✓ Target fast rotation to maximize value creation

### Selective Investment Example

IRB &  
IRB Private  
Invit

Texas  
photovoltaic  
plant in Milam  
County (USA)

## Highways' growing dividend trend: a strong foundation for future CF generation

| DIVIDENDS (M EUR) | 2016 | 2017 | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 |

# 407 ETR

Toronto (Canada)

cintra

## Asset overview

### A congestion-free toll road in the heart of Greater Toronto Area

- » 407 ETR is located in Toronto, Canada. It stretches from Burlington (in the West) to Pickering (in the East).
- » A fast-growing area in Canada's largest economic hub.
- » Toronto is the 2<sup>nd</sup> most congested city in Canada and 9<sup>th</sup> in North America<sup>1</sup>.
- » GTA (Greater Toronto Area) is projected to see the largest increase in population among Ontario regions, from 7.7M million in 2024 to 9.4M by 2051<sup>2</sup>.
- » Toronto's average GDP growth (2.3%) to exceed Ontario (1.9%) and Canada (1.8%) over next 5 years<sup>3</sup>.

407 ETR avg rush hour speed was 31 mph higher than any other alternative in 2025<sup>4</sup>

Shareholders: 48.29% Cintra – 44.20% CPPIB – 7.51% PSP Investments

- » 108 km (67 miles) with 24 segments.
- » Runs parallel to the 401, one of North America's most congested highways.
- » 99-year concession term. Opened in 1999.
- » 72 years remaining to maturity (2098).
- » Free flow, fully electronic with 204 entry-exit points.
- » Has flexibility to set tolls by segment and time of day to manage traffic.

**77.5%**

of drivers using transponder

## Historical financial figures

## Pricing framework & revenue structure

### 407 ETR has flexibility to set toll rates

- » Flexible tolling regime designed to provide congestion relief in the corridor.
- » Rates are structured to keep 407 ETR fast, safe and reliable.
- » Flexibility to charge different tolls for each segment, direction and time with no cap.
- » Toll rate changes can be introduced at any time, with a one-month notice to the MTO (Ministry of Transportation of Ontario) is required.
- » Toll increases aimed to provide a high level of service to users while optimizing net revenue.
- » Targeted promotions may be applied to encourage an efficient use of the road.

### Revenue structure

#### TOLL REVENUE (approx. 94% of total revenue):

- » **Trip Toll Charge** is applied for each trip in addition to the per kilometer charge. (Light vehicles \$1, Heavy vehicles \$2, Heavy Multiple Unit Vehicles \$3). The Heavy Vehicle per Km rate applies for vehicles over 5,000 Kg (large trucks and buses).
- » **Camera Charge fee** per trip is added when a vehicle travels without a valid transponder. Additionally, an unrecognizable plate charge is levied each time a vehicle uses the highway without a valid transponder when that vehicle's rear license plate's identifying features are not recognizable by the toll system

#### FEE REVENUE (approx. 6% of total revenue):

- » Include monthly transponder lease fees and annual transponder lease fees relating to the maintenance, billing of non-transponder customer accounts, late payment charges, enforcement fees for past due amounts and service fees related to tolling, billing and back-office services.

## Congestion Payment (Schedule 22)

### AT A GLANCE

- » The Contract includes payments to the Province if traffic levels remain below contract-set minimum relief traffic thresholds. If two conditions are met:
  - » TOLL RATES: Standard rate (toll rate) > Toll rate threshold
  - » TRAFFIC: Average segment flow rate (Traffic Level) < Traffic Threshold

### CALCULATION

- » Calculated annually on a per segment basis (24 segments).
- » Calculation is based on "peak of the peak": 2h with highest VKTs in all business days and then, the average of the 60% busiest days.

### S22 PROVISION<sup>1</sup>

- » That provision was based on the estimated traffic data for the whole year and accrued on a monthly basis based on the % of traffic in the corresponding month over the expected traffic for the year (seasonality may impact traffic along the year). The provision was rebalanced along the year with actual traffic data.
- » In 2025, a provision of CAD 40.9M was accrued as an apex.
- » The final calculation and corresponding cash payment are completed in April of the following year.

### CALCULATING SCHEDULE 22 PAYMENTS

Schedule 22 Payment is applied if two conditions are met:

- ✓ The rush hour traffic on any segment-direction (ASFR) is below the pre-determined Traffic Threshold<sup>2</sup>.
- ✓ Rush hour tolls (actual toll/km charged on the segment) are above the Toll Threshold. There is a single Toll Threshold for the entire 407 ETR.

$$2x \text{ ANNUAL SEGMENT TOLL REVENUES } \times \% \text{ TRAFFIC UNDER TRAFFIC THRESHOLD}$$

Note: For more details, visit the excel file corporate fact book.

(1) Schedule 22 paid twice in 20 years, C\$28.7k in 2003 (0.01% 2003 revenues) and C\$1.8M in 2019 (0.12% 2019 revenues).

(2) Traffic Thresholds will be updated on annual basis.

## Mandatory capacity improvements

### Expansion requirements: Schedule 22, Article 4

- » An Expandable Segment is defined as a segment that has not reached its Ultimate Number of Core Lanes and the Lane Flow Rate exceeding 1,700 vehicles during a Peak Hour for more than 125 Hours in a calendar year
- » The designated Expandable Segment each year is defined as the Segment with the highest average Lane Flow Rate during all Peak Hours in the prior calendar year
- » Each calendar year, the Concessionaire will identify if there is any Expandable Segment. The Corresponding Segment shall be widened by at least one core lane within a 2-year period.

### Expansion progress

- » East (15 km) and west (24 km) extensions were completed in 2001
- » 315 lane-kilometers added since the extensions were completed
- » 12% remaining road capacity can be increased until Ultimate Capacity

## Public information

SEDAR – System for Electronic Document Analysis and Retrieval

WEB PAGE: [SEDAR](#)

### Information

- » SEDAR is an electronic filing system that allows listed companies to report their securities-related information to Canada's securities regulation authorities.
- » SEDAR is the Canadian equivalent of the SEC's EDGAR, the U.S. electronic system for filing securities information.
- » More information is available in the 407 ETR webpage.
  - [Major Financial Filings | 407 ETR](#)

### Reported information

- » Certification of Annual Filings (CEO and CFO)
- » Certification of Interim Filings (CEO and CFO)
- » Annual Information Form
  - Corporate structure
  - General development of business
  - Capital structure
  - Others
- » Audited annual financial statements
- » Auditor's consent letter

## Asset description (I)

- » A solution to congestion on existing urban corridors through active management of newly added capacity through dynamic pricing
- » Every driver has the option to pay for a faster, safer and more reliable trip
- » Dynamic pricing guarantees minimum level of service
- » Free Flow, fully electronic tolling: no booths/ no queues

Express toll way  
within an existing  
highway

## Asset description (II)

# NTE | LBJ | NTE 35W

Dallas Fort-Worth

## Overview

### SIGNIFICANT LOGISTICS DEVELOPMENTS IN THE REGION

ferrovial

### Best driving experience in Dallas-Fort Worth

- » DFW is a metroplex with a widespread population and multiple employment centers
- » The area ranked 1<sup>st</sup> in the US for absolute population growth<sup>1</sup>
- » Estimated population growth in the North and West expected to stress the already congested network

**NTE35WEXPRESS** industrial corridor with heavy traffic that drives to Austin, San Antonio & Mexico. It is a long haul route with heavy traffic and surrounded by logistics areas and airports. It has a higher exposure to commercial traffic than others.

**NTEEXPRESS** natural route from Fort Worth to Dallas and from Fort Worth to the airport. The traffic is a mixture of commercial and logistics, together with individuals.

**LBJEXPRESS** ring road, mostly used by suburban traffic. People that live in the suburbs and have to move to Dallas downtown and to the airport.

## Pricing Framework

### Toll rate mechanism

**Soft Cap:** The TEXpress Lanes operate with a soft toll cap per mile pegged to US National CPI-U December over December.

**Under the Cap, Dynamic Mode:** Total freedom to charge any amount below the soft cap. Tolls set in real time and updated every 5 minutes.

**Over the Cap, Mandatory Mode:** In order to guarantee a minimum level of service, the contract mandates for tolls to exceed the soft cap until traffic conditions improve. There is no upper limit. The cap can only be exceeded if:

- Speeds on the managed lane fall below 50 mph.
- Or Volumes on the ML exceed 3,300 PCE/HR on a 2-lane section or 5,100 PCE/HR on a 3-lane section.

### Fee structure: Price on sign \* Truck Multiplier \* HOV Discount \* Video Surcharge

**TAG (PRE-PAID):** If vehicle is equipped with an electronic tag, driver will pay the price on the sign and no additional fees.

**EXEMPT VEHICLES:** Police, buses, concession-owned vehicles and first responders drive for free.

**Truck Multiplier:** Pay a fixed multiplier of the price on the sign based on vehicle classification. Multiplier 2x to 5x.

**HOV Discount:** pre-declared HOV's are entitled to a 50% discount during peak hours. Reimbursed to the concession by the local authority.

**VIDEO (surcharge):** The video fee is charged if a vehicle has no tag or an invalid tag. The driver will pay the toll amount plus a 100% premium. This fee is not reimbursed to the concession by the NTTA.

**Toll Collection:** A transaction file is sent to NTTA and payment is received from TxDOT, net of NTTA's fees and video fees, 2-3 days after. TxDOT reimburses the concession with the HOV subsidy.

HIGHWAYS | NTE, LBJ &amp; NTE 35W

## Revenue Structure

**Toll revenue** (approx. 99% of total revenue):

» NTTA (North Texas Tollway Authority) bills customers and performs collection services on behalf of the Concession Company with collection risks fully borne by NTTA. TxDot pays within 2-3 business days after the transaction files are received from the Concession Company.

» The Concession Company invoices TxDot for 50% of the cost of HOV that was not billed to the users.

**Other revenue** (less than 1% of total revenue):

» Consists of reimbursements for accident-related damages.

# Contractual payments to the Department of Transportation (DOT)

## Revenue share

- » Requirement under the Concession Agreement.
- » Compares cumulative actual revenues with "Revenue Bands" defined at Financial Close.
- » Progressive sharing (from 0% to 75%) of cumulative actual revenue that exceeds such bands.
- » If the operating period in the first or last calendar year is less than a full calendar year, the applicable amounts of the Revenue Band floors and ceilings will be adjusted pro rata based on the number of operating days<sup>(1)</sup>.

- More Information:
- NTE: [North Tarrant Express - CDA Exhibit 7 - Compensation Terms \(txdot.gov\)](#)
  - LBJ: [LBJ Express - CDA Exhibit 7 - Compensation Terms \(txdot.gov\)](#)
  - NTE 35W: [North Tarrant Express Segments 3A, 3B, and 3C - Exhibit 7 - Compensation Terms \(txdot.gov\)](#)

## Refinancing gain

- » TxDOT's right to a portion of any Refinancing Gain, and to a potential gain from an Initial Financing.
- » Calculation Methodology: Net Present Value (NPV) of the variance between the dividends of the pre-refinancing structure and that of the new financial structure at the refinancing date. In the event of a positive NPV, a certain percentage of the gain will be shared with TxDOT.

### PERCENTAGE SHARING:

- » NTE: 75% of any Refinancing Gain from a Refinancing using credit assistance under the TIFIA (Transportation Infrastructure Finance and Innovation Act) and PABs (Private Activity Bonds) commitment and 50% of any other Refinancing Gain.
- » LBJ: 75% of any Refinancing Gain from a Refinancing using credit assistance under the TIFIA and PABs commitment and 50% of any other Refinancing Gain.
- » NTE 35W: 50% of any Refinancing Gain.

## LBJ Wishbone Facility Revenue Share

- » The LBJ Wishbone Facility is not part of the Project but serves as an additional interchange facility for the Project Managed Lanes and its operation resulted in an increase in revenues.
- » TxDOT has the right to a 50% share of the net proceeds of the transactions recorded at Wishbone Toll Gantries.

### 2025 Payments to DOT:

- Revenue Share Accrued 2025:
  - \$26.4M NTE 35W
  - \$8.1M NTE
- Refinancing gain: \$6.6M NTE 35W
- LBJ Wishbone Revenue Share: \$5.6M LBJ

## NTE - Mandatory Capacity Improvements

TYPICAL SECTION  
SEGMENT 1

TYPICAL SECTION  
SEGMENT 2

- » Contractual obligation to design and build the Mandatory Capacity Improvements once certain revenue thresholds are met.
- » The project consists of the addition of 1 GPL per direction on segment 1 and 1 ML per direction on Segment 2.
- » Given the asset's positive performance, the obligation to execute this extension was triggered in 2023.
- » Construction period: 2023 – 2027. (Expected end of 2026)
- » Total investment of \$355M.
- » NTE has issued \$414M<sup>(1)</sup> using Private Activity Bonds (PABs), at 5.5%.

More Information:

[Texas Private Activity Bond Surface Transportation Corporation \(tmsb.org\)](https://www.tmsb.org/)

67% completed as  
of Dec 31, 2025<sup>(2)</sup>

ferrovial

(1) Use of Funds (\$414M): Mandatory Capacity Improvements \$355M, Major Maintenance - Renewal work \$51M, Issuance Costs \$5M, Underwriters' discount \$2M, Adjustments to the contract price \$2M.  
(2) Source: EMMA. DBIC has completed 31.4% of the total current contract amount (\$230.2M of \$342.0M).

## NTE 35W – Mandatory Capacity Improvements

### NTE 35W – 3A 3B

- » **Project Description:** The Concession will be responsible to design, build, operate and maintain an additional General Purpose Lane (GPL) per direction of segments 3A3B. TxDOT will fully fund the investment and, it will compensate for any revenue loss derived from the construction works or/and the capacity increase, according to a formula included in the contract.
- » **Construction trigger:**
  - TxDOT's discretionary decision.

### 3C

- » **Project Description:** Construction of 1 additional GPL per direction. The Concession will be responsible for the design, construction, operation, maintenance and financing of the Project.
- » **Construction trigger:**
  - TxDOT's discretionary decision.
  - To be built no later than 1/1/2040, subject to TxDOT's discretionary decision to modify the date.
  - In the event of earlier/later request, there will be a compensation according to a formula determined by the contract.

### 3C – THE GOLDEN TRIANGLE BRAIDED RAMPS

- » **Project Description:** Construction of two bridges and related elements for the connection of the GPL and ML's in both directions (north/south) in the section between Golden Triangle Boulevard and Keller Hicks Road. The construction of these "braided ramps" will lead to the elimination of current access points and the construction of new ones to improve connectivity. The Concession will be responsible for the design, construction, operation and maintenance costs, as well as financing the Project.
- » **Construction Trigger:**
  - The construction trigger is activated if for 20 consecutive business days, during peak hour the speed of the GPL goes under 40 miles per hour. The construction period once the trigger has been activated is 18 months, which could be agreed between TxDOT and the Concession.
  - Even if the trigger event is not met, the ramps have to be built by 1/1/2035.

# I-66

## Northern Virginia

---

## HIGHWAYS | I-66

## Overview

## Serving one of the highest-income suburbs in the US

- » I-66 is the main east-west interstate highway in Northern Virginia connecting Washington DC and Arlington with the Northern Virginia suburbs.
- » Design & Construction of 2 Express Lanes and modification of the existing design to accommodate 3 general purpose lanes in each direction.
- » Directional traffic in the West. In the East, heavy traffic in both directions with significant congestion during peaks. I-66 serves a growing number of logistics businesses along the corridor.
- » Congestion expected to increase by 48% in 2045<sup>1</sup>

## KEY Population Change from 2020 to 2045

- Less than 0
- 0 to 500
- 500 to 1,000
- Greater than 1,000
- Transportation & Logistics Areas

ferrovial

(1) 2025 Annual Survey, conducted by Innovative Research Group (INNOVATIVE) for I66 and Cintra. The survey was conducted among a representative sample of n=604 North Virginia area residents with data collection happening between October 17th and November 4th, 2025.

## Historical financial figures

## Pricing framework

### Toll rate mechanism

The 66 Express Lanes offer a dynamic pricing system that adjusts toll rates based on real-time traffic conditions and demand. This dynamic system is designed to prevent congestion, keep traffic flowing in the express lanes at minimum speeds of 55 mph.

When demand increases, tolls adjust upward, but as traffic lessens, tolls on the 66 Express Lanes are lowered. This allows drivers to decide when to take advantage of the 66 Express Lanes, making it the best option for those seeking a faster and more efficient route.

Fees and charges associated with travel on the highway:  
[Get Ready for a Trip on the 66 Express](#)

### Fee structure: $\text{Price on sign} * \text{Truck Multiplier} * \text{HOV Discount} * \text{Video Surcharge}$

**Transponder/tag (pre-paid):** If a vehicle is equipped with a transponder/tag, the driver will pay the price on the sign and no additional fees.<sup>1</sup>

**Exempt vehicles:** Police, bus, concession-owned vehicles, and first responders drive for free.

**Truck Multiplier:** Pay a fixed multiplier of the price on the sign based on vehicle classification. There is a minimum toll factor of 3x at off peaks & 5x at peaks, with freedom to set multipliers above that. Currently toll factors up to 6x during non-peak hours & 8x during peak hours.

**HOV Discount:** Per VDOT policy, toll-free travel is given to non-commercial vehicles with 3+ passengers that have a E-ZPass Flex transponder set on HOV-On.

**Video surcharge:** If vehicle has no tag or an invalid tag, the driver will pay the toll amount plus administrative fees.

**Toll Collection:** E-ZPass customer related transactions are paid by VDOT and video transactions are collected directly from the customers.

## Revenue structure

### Toll revenue (approx. 96% of total revenue):

- » Transponder/tag customers: I-66 collects 100% of revenue from VDOT.
- » Video customers (vehicles without a transponder): I-66 EMP directly bills and performs collection services, and bears the risk related to collecting revenue from video trips.

### Other revenue:

- » Consists of reimbursements for accident-related claims.

## Contractual payments to the Department of Transportation

### Revenue share

- » Requirement under the Concession Agreement.
- » Compares the Net Present Value of actual cumulative revenues from the opening date, with specific "NPV Bands" defined at Financial Close.
- » Whenever the Net Present Value of actual cumulative revenues exceeds such NPV Bands, revenue will be shared.
- » The five NPV Bands were defined as the Net Present Value as of Financial Close of the projected revenues for each of these upside revenue scenarios.
- » Such NPV Bands were finally incorporated in the Concession Agreement and are fixed and not subject to adjustments since then.

|                      | Sharing |
|----------------------|---------|
| 1 <sup>st</sup> Band | 0%      |
| 2 <sup>nd</sup> Band | 10%     |
| 3 <sup>rd</sup> Band | 20%     |
| 4 <sup>th</sup> Band | 30%     |
| 5 <sup>th</sup> Band | 40%     |

### Support for corridor improvements

- » Used by VDOT to cover improvements in the corridor at its discretion. Payments should start in 2056. (Using base date of November 15, 2020, and a discount rate of 6.14 percent, the present value of the Support for Corridor Improvements must total \$350M).
- » Priority of such payments is after "Lender-related requirements (except voluntary prepayments)" and Transit Funding Payments, but prior to Distributions.
- » If funds are insufficient to fully pay required Support for Corridor Improvements, the Developer must provide a detailed calculation and explanation to the Department.
- » Any unpaid balance remaining at the end of the Term shall be cancelled and no longer an obligation of the Developer under the Agreement.

### Transit funding payments

- » Dedicated to operate Virginia's transit system.
- » Payments started in 2021. Total Payments amount to \$1.517M (nominal terms) over the life of the concession.
- » Shall be payable after debt service and reserve accounts and will be subject to lockup provisions required in the TIFIA loan agreement, but prior to Support for Corridor Improvements and prior to Distributions.
- » If funds are insufficient to make a scheduled payment at the time it is due, the scheduled payment, or any unpaid portion will be considered past due and will remain due and payable without interest.

### Refinancing gain

- » DOT's rights to a portion of any Refinancing Gain, and to a gain from an initial Financing.
- » Calculation Methodology: Net Present Value (NPV) of the variance between the dividends of the pre-refinancing structure and that of the new financial structure at the refinancing date.

In the event of a positive NPV, a certain percentage of the gain will be shared with VDOT.

#### PAYMENT, Developer shall pay to the department:

- » 50% of any Refinancing Gain from a Refinancing that is not an Exempt Refinancing.

I-77

Charlotte | North Carolina

## HIGHWAYS | I-77

## Overview

## A key growth enabler for Charlotte region

- » I-77 is a **high-growth** corridor that connects Charlotte with its dynamic northern suburbs
- » Express lanes opening since the end of 2019 has improved speed across the entire corridor
- » It serves a mix of **local and long-distance** interstate trips
- » **Rapid growth anticipated along the corridor** with no real alternative routes
- » 50% of roads in the region expected to be over capacity by 2040<sup>2</sup>

For more information on I-77, please visit  
Ferrovia's YouTube page [here](#).

## Pricing framework

### Toll rate mechanism

Dynamic pricing system that adjusts toll rates based on real-time traffic conditions and demand. This dynamic system is designed to prevent congestion, keep traffic flowing in the express lanes at minimum speeds of 45 mph.

When demand increases, tolls adjust upward, but as traffic lessens, tolls on the I-77 Express Lanes are lowered. This allows drivers to decide when to take advantage of the Express Lanes, making it the best option for those seeking a faster and more efficient route.

Freedom to set toll rates with no cap, I-77 must notify NCDOT 30 days in advance max and min rate.

Fees and charges associated with travel on the highway: [Toll rates - I77 Express](#)

### Fee structure: Price on sign \* Extended vehicles Multiplier \* HOV Discount \* Video Surcharge

**NC QUICK PASS (PRE-PAID):** If vehicle is equipped with an electronic tag driver will pay the price on the sign and no additional fees. Customers with a NC Quick Pass account save 35% on tolls.

**BILL BY MAIL:** Users without NC Quick Pass will be billed using a license plate toll collection system that captures images of the vehicle and bills the registered owner. Customers receive an invoice mailed to the address the vehicle is registered to through their state's DMV. The unpaid toll transactions will be subject to processing fees and civil penalties on following invoices and may be sent to collections.

**EXEMPT VEHICLES:** Police, highway patrol, medic, fire, transit, concession owned vehicles and motorcycles.

**EXTENDED VEHICLES<sup>1</sup>:** 2-axle vehicles with more than 22 feet or 2-axle vehicles carrying a one-axle trailer. The current multiplier is 2x during off-peak periods and 3x during peak times. (I-77 does not need approval from NCDOT for modifying the multiplier, always maintaining a number lower than 4x).

**HOV DISCOUNT:** pre-declared HOV's 3+ are entitled to a 100% discount.

**TOLL COLLECTION:** Transaction files and an invoice are sent to NCTA each weekday for payment, which are then due within 5 business days.

## Revenue structure

### Revenue structure

#### Toll revenue (approx. 99% of total revenue):

- » NCDOT bills customers and performs collection services on behalf of the Concession Company. Collection risk is fully borne by NCDOT, which pays within 5 business days after the transaction files are received from the Concession Company.

#### Other revenue:

- » NCDOT makes to the Company an Annual O&M Payment (\$1M, adjusted for CPI) for the performance of Routine & Planned maintenance in the General-Purpose Lanes.
- » Reimbursements for accident-related damages.

Toll revenue per transaction (\$)

## Contractual payments to the Department of Transportation

### Revenue share

- » Requirement under the Concession Agreement.
- » Compares cumulative actual revenues from the opening date with "Revenue Bands" defined at Financial Close.
- » Progressive Sharing (from 0% to 75%) of cumulative actual revenues that exceeds such bands.
- » If the operating period in the first or last calendar year is less than a full calendar year, the applicable amounts of the Revenue Band floors and ceilings will be adjusted pro rata based on the number of operating days (published bands have already been adjusted).

[Amendment 12 to the CA \(ncdot.gov\)](#)

ferrovial

### Refinancing gain

- » DOT's right to a portion of any Refinancing Gain, including a gain from an Initial Financing.
- » Calculation Methodology: Net Present Value (NPV) of the variance between the dividends of the pre-refinancing structure and that of the new financial structure at the refinancing date. In the event of a positive NPV, certain percentage of the gain will be shared with TxDOT.
- » Payment to the DOT: 50% of any Refinancing Gain from a Refinancing that is not an Exempt Refinancing.
- » First Refinancing gain happened in 2024 with TIFIA full repayment and new Debt (NPA)

### User Classification for Extended Vehicles

- » Even though trucks were not part of the original concession agreement, a pilot program was agreed with the DOT to allow them to use the ML's.
- » The pilot program expired in September 2024 and a final agreement was reached then until the end of the concession term.
- » DOT's right a 66.67% of the net amount of: Extended Vehicle Transponder Toll Rate less Transaction Fees, Variable Fees, Pass Through Fees and discounts applied by Developer in the Transaction file applicable to the Toll Segment associated with the Transaction.

#### 2025 Payments to DOT:

- Revenue Share Accrued 2025: \$21M (extended vehicles included)

Note: Calculation examples for Revenue share & refinancing gain are included in the Investor Excel file published on FER website

# IRB Infrastructure Developers LTD (India)

---

HIGHWAYS | IRB INFRASTRUCTURE DEVELOPERS, LTD

## IRB investment rationale

- Value creation in selected investments outside North America where Ferrovial can find high long-term growth prospects
- Population growth expected to lead the largest middle class in the world
- One of the biggest highway concession markets in the world
- IRB is one of the best positioned companies to capture India's future growth
  - » In-house EPC capabilities to develop greenfield projects (vertical integration)
  - » One of the largest highway infrastructure players in India with a **27-project portfolio** and footprint in **12 States**

ferrovial

JFK after capacity expansion

- Area currently occupied by Terminals 1 and former Terminals 2 and 3
- Expected to operate as one of future four terminal complexes at JFK
- Largest terminal in JFK and the avenue for international growth

(1) Phase B1 and Phase B2 need to go through design, construction, and Port Authority (PANYNJ) and other governmental approvals and are based on defined triggers set by the PANYNJ  
(2) WB: Widebody & NB: Narrowbody

## Overview (V)

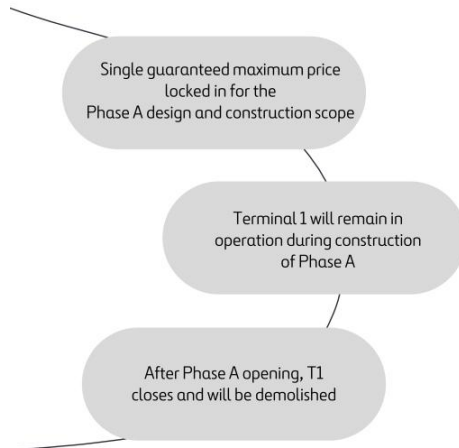

NTO is the only terminal expected to grow significantly in the coming years<sup>1,2</sup>

2023

JFK after capacity expansion

## Construction. Phase A

### DB CONTRACT

**Tishman:** highly experienced NYC and airport builder

- » 120 years of experience including One World Trade Center
- » 18 PANYNJ projects and 65+ airport projects delivered

#### Contract terms

- » Pass-through of the majority of NTO obligations and liabilities for construction work
- » For example, in case of a failure to meet Phase A DBO date under the Lease liquidated damages would become payable to the Port Authority commencing one year after such failure (\$50k/day). Failure by TCC to achieve the Phase A DBO milestone (June 1, 2026) triggers liquidated damages of c.\$500k per day, subject to a 30-day grace period and a \$320m cap

### PMO

- » Ferrovial Construction, worldwide recognized contractor, manages the PMO, provides advice to NTO and reports progress and manages the interface with the Port Authority

## Phase A, 2025 Milestones Achieved

underway

ferrovial

<sup>1</sup> As of December 2025

## Phase B

Phase B1 and B2 are based on defined triggers set by the Lease and need to go through design, construction, and PANYNJ and other governmental approvals

### Obligations regarding Phase B1

The Lessee is required to use commercially reasonable efforts to obtain an IG rating, not earlier than nine months and not later than six months prior to the anticipated scheduled Phase A DBO, considering also a reduced Phase B1 which would postpone two gates to Phase B2 (pursuant to the Two-Gate Toggle<sup>1</sup> mechanism)

- If an **Investment Grade** rating is obtained, Phase B1 Notice to proceed (NTP) is subject to Phase A DBO, tender of the Second Additional Premises to the Lessee, and receipt of all required governmental approvals
- If **IG cannot be obtained despite commercially reasonable efforts by the Lessee**, the Lessee is required to submit an alternative financing plan to the PANYNJ and to issue the NTP no later than nine months following Phase A DBO and occurrence of delivery of premises, governmental approvals and traffic thresholds

If Lessee fails to issue Phase B1 NTP within 30 days since required to do so, it will pay the PANYNJ a \$25m Contingent Rental for a +9 months extension to issue NTO and the PANYNJ may add up to 3 new permanent wide-body contact gates at JFK T4

### Obligations regarding Phase B2

A regulation similar to the above one also applies to B2 in reference to B1

- (1) Two wide-body gates from B1 may be transferred to B2 if a three-gates Phase B1 can be financed with IG debt
- (2) This is adjusted to 22m under certain conditions in which Terminal 4 has further expanded
- (3) This is adjusted to 6.0m if Phase B1 were to be reduced to three gates

### Traffic triggers

- The traffic trigger for Phase B1 is the earliest of:
  - » PANYNJ notifying international enplanements at JFK have recovered to 2019 levels during any six-month period corresponding to the same six months in 2019, or
  - » NTO exceeding 4.5m enplanements on a rolling 12-month basis
- The traffic trigger for Phase B2 is the earliest of:
  - » PANYNJ international enplanements at JFK exceeding 20m<sup>2</sup> on a rolling 12-month basis, or
  - » NTO exceeds 6.7m enplanements<sup>3</sup> on a rolling 12-month basis

**THE NEW TERMINAL ONE**  
BY INTERNATIONAL AIRPORT

**VIVO**

**Non-US for airline**

**ANZ**

As of Ferrovial's Fact Book release (May 2026), Ferrovial has agreements with 30 airlines, which consist of 21 executed agreements and 9 Letters of Intent (LOIs).

Non-US long-haul airlines

# Cost per enplanement

Benchmark of other competing terminals

(1) Data from third party source: Steer Report (2025).  
Note: Ferrovial does not confirm or endorse such report and takes no responsibility for it. The existing Terminal 1 management signed up new carriers at CPE rates between \$45 and \$65 in 2021 and early 2022, despite the down year of enplanements. Source: Steer Report (2025). After Phase A opening, T1 closes and will be demolished

# Revenue

## Aero Revenue Breakdown

### Common Use Facility Charges (75%) - Cost Per Enplanement (CPE)

- » **Gross revenue:** the main source of income is structured as a fee per departing (enplaned) passenger. Escalated annually by CPI+1%  
Gross revenue might be reduced by discounts or incentives<sup>(1)</sup> offered to airlines, leading to a decrease in the revenue line

### Other Aero (10%)

- » **Exclusive Use Space Rent:** Based on the amount of space rented out by airlines on an exclusive basis. A shared mechanism is applied<sup>(2)</sup>. Share amount will be part of OPEX
- » **Hardstand Rent:** Based on the hardstands rented to Delta Air Lines

## Non-aero Revenue Breakdown

### Concessions (12%)

- » The gross rent paid by the master concessionaire: URW<sup>(4)</sup> running the duty free, retail, services and food and beverage units within NTO. A shared mechanism is applied<sup>(2)</sup>. Share amount will be part of OPEX

### Advertising (2%)

- » Corresponds to the 50% of the advertising revenues generated by the New Terminal One facilities collected by the Port Authority, after deducting the manager's advertising share

### Other (1%)

- » Includes other small sources of non-aero revenue, such as the reimbursement of metered utilities of the terminal tenants

(1) Discounts or incentives to airlines are subordinated to debt service and are deferrable. Incentives may have a significant impact during the first years of operations

(2) The revenue sharing mechanism is explained in more detail across two slides

(3) Infographic shows proxy figures

(4) URW: Unibail-Rodamco-Westfield

Note: The illustrative revenue breakdown and other forward-looking descriptions above are for illustrative purposes only and should not be relied upon for the purpose of making any investment, entering into any business arrangement or for any other purpose

# OPEX

OPEX – other than PANYNJ payments<sup>1</sup>

(1) Infographic shows proxy figures

(2) PRM: passenger with reduced mobility

(3) MSA: Management Service Agreement

(4) The fixed rents payable to PANYNJ are explained in more detail across two slides

Note: The illustrative opex breakdown and other forward-looking descriptions above are for illustrative purposes only and should not be relied upon for the purpose of making any investment, entering into any business arrangement or for any other purpose

Payments to PANYNJ

OPEX

**VARIABLE PAYMENTS**  
Exclusive Use Space Rent, Common Use Lounges, and concessions revenue shares are treated as ongoing operating costs, recognized as they are incurred

**FIXED PAYMENTS<sup>4</sup>**

The present value of Ground, First, Second and Third Rents was recognized upfront, reflecting the right to use the space and the associated long-term commitment, which will be gradually recognized in the results over the life of the lease once the project becomes operational

## OPEX / Revenue sharing mechanisms

### Aero Revenue: Exclusive Use Space Rent

- » NTO aeronautical revenues are not shared with the PANYNJ except for 10% of gross terminal rental revenue for exclusive-use spaces, such as airline offices and lounges

### Aero Revenue: Common Use Lounges

- » There is 50% of the common use space revenue-share between PANYNJ and the Operator

### Non-Aero Revenue: Concession term

- » 50% of the concessions term revenue collected by URW is shared with the PANYNJ
- » The other 50% of the concessions revenues is shared between URW and NTO
  - The revenue sharing mechanism consists of URW paying to NTO a per-enplanement fee based on a tiering mechanism
  - Despite the tiering mechanism, NTO will receive a Minimum Annual Guarantee (MAG) per-enplanement fee
- » For more details, visit the Excel file Corporate Fact Book on Ferrovial's Investor Relations website

## Other payments to the PANYNJ

Payments to the Port Authority (other than the revenue share)

| Rent type        | Annual amount                                                     | Escalation                               | Starting at                                | Subordination / Deferral                                             | Yearly payments*     |

**BOND MATURITY SCHEDULE (\$M)**

NOTE: Except for narrowly defined exempt cases, any refinancing requires Port Authority consent and is permitted only if it does not increase lease-related financial risk, indebtedness, or obligations, adversely affect the Lessee's performance, or divert proceeds to non-customary or non-capital uses

## Debt Service Ratios – Coverage, Investment Grade

### Rate Covenant for Secured Obligations

The Lessee must set rates under the Airline Use Agreement to achieve a Projected TOCR<sup>(1)</sup> of 1.25:1.00 for each TOCR Calculation Period starting January 1 of each Fiscal Year after the Lease Completion Date

### Limitations on Permitted Indebtedness

Permitted Refinancing Indebtedness can be incurred if Debt Incurrence Conditions are met, and the Administrative Agent receives:

- An updated base case financial model showing a minimum Projected TOCR of 1.40:1.00 for each four-quarter period from the incurrence date to the end of the Lease Term
- A reaffirmation letter from at least two Rating Agencies confirming the Senior Debt remains Investment Grade after the refinancing

### Dividend Lock Ups

No dividend distribution is allowed until, following DBO (Date of Beneficial Occupancy), the first Total Obligations Coverage Ratio calculation date happening, and the earlier of:

- The Notice to proceed (NTP) for phase B1 is issued
- 3rd anniversary of phase A Date of Beneficial occupancy (DBO) Account if:
  - The TOCR for the preceding Calculation Period was at least 1.15:1.00.
  - The Projected TOCR after the Distribution is at least 1.15:1.00 for the next Calculation Period

Except for narrowly defined exempt cases, any refinancing requires Port Authority consent and is permitted only if it does not increase lease-related financial risk, indebtedness, or obligations, adversely affect the Lessee's performance, or divert proceeds to non-customary or non-capital uses

Cash flow

ferrovial

(1) Debt service reserve account, O&M reserve account & Major Maintenance reserve account

## Ferrovial financial obligations related to NTO

### Earn-out

Ferrovial agreed with the Carlyle Group on the payment of earn-out consideration should Carlyle divest its outstanding indirect 2% interest in NTO. This earn-out payment would be triggered either if Carlyle transfers its stake to a third party or to the Company and depends on the value created by the project. An estimation of the earn-out payment was included in our valuation of the investment as presented in the Audited Financial Statements. Any future changes in the valuation of the earn-out may affect our results.

### Call / Put option

In addition, a call/put option was agreed between Carlyle Group and Ferrovial over the shares that the former indirectly holds in the project. It is exercisable by Carlyle from June 2028 to June 2032 and by Ferrovial from January 2031 to June 2034. The strike price will be based on an estimate of the fair value at the exercise date (and could trigger the earn-out described above). The call/put option does not meet the requirements included in the definition of a liability.

It offers close proximity to tourist attractions, contributing to the economic development of the region by providing leisure options to international passengers

One of the most attractive tourist regions in Turkey

Dalaman Airport

The region of Sarigerme located in Muğla Province, has been declared as a Tourism development area.

It is a stable asset for the Airports' portfolio due to its limited exposure to Turkish GDP and FX

## Demand Profile

During 2025:

- **5.6M passengers** passed through the airport, consolidating 2024 figures
- International traffic represented close to 65% of the total traffic in 2025

# CONSTRUCTION

## Key to the development of greenfield projects. Focus on markets with a commitment to infrastructure development

## Budimex overview

- » Ferrovial took an initial stake in Budimex in 2000<sup>1</sup>
- » Shareholders: 50.1% Ferrovial, 30.4% Free-float, 8.4% Nationale Nederlanden OFE, 8.0% Allianz OFE and 3.1% PZU OFE
- » The largest company construction industry in Poland
- » Provides services in the infrastructure sector, including the construction and maintenance of roads, railways, airports and commercial buildings, as well as in the energy, industrial and environmental segments
- » Additionally, provides assembly services, using the mineral and asphalt mixtures and prefabricated steel products it produces
- » Operating in Central and Eastern Europe (Germany, the Czech Republic, Slovakia and Latvia)

ferrovial

Ferrovial Construction

- » Born in 1999 from the merger of the construction businesses of Ferrovial and Agroman (renamed Ferrovial Construction in 2020)
- » International leader in the Construction Industry
- » Experts in highly complex projects and added value of civil works, buildings, industrial works and transport infrastructures (P3)

Webber LLC

- » Ferrovial acquired Webber in 2005
- » Leading U.S. construction company based in Texas
- » Supports a wide range of project models, including traditional design bid build, design build, alternative delivery models and public private partnership (P3) solutions
- » Specializes in heavy civil, waterworks, energy and infrastructure management

## Historical Data

### ADJ. EBIT<sup>1</sup> & ADJ. EBIT MARGIN<sup>1</sup>

### ORDER BOOK<sup>1,2</sup>

(1) Non-IFRS financial measure. For the definition and reconciliation of the most directly comparable IFRS measure, refer to Alternative Performance Measures of the Ferrovial 2025 Integrated Annual Report.  
 (2) In 2024, Ferrovial conducted a partial reorganization of our Business Divisions pursuant to which the energy solutions business line, which was part of the Construction Business Division, and the energy infrastructures business line, which was part of the former Energy Infrastructure and Mobility Business Division, merged. Information presented in this Investor Presentation for prior historical periods (2022-2023) to this segment change has been revised to reflect the partial reorganization. Additionally, 2020 Construction orderbook has been changed including the Infrastructure Maintenance Services of USA and Canada, following the Services divestment.

See Integrated Annual Reports of Ferrovial for the years 2016-2025, available at <https://www.ferrovial.com/en/ir-shareholders/financial-information/integrated-annual-report/> for further information.

# ENERGY

# 3 FINANCIAL PROFILE

Debt structure

Cash Flow details

Historical financial data

## Financial structure: Investment grade at corporate level & non-recourse debt at infrastructure project level

CORPORATE: STRONG BALANCE SHEET PROVIDES RESILIENCE AND OPTIONALITY

FY 2025 figures

(1) Consolidated Net Debt corresponds to the Group's net balance of cash and cash equivalents (including short and long-term restricted cash) minus financial debt (bank debt and bonds, including short and long-term debt) including a balance related to exchange-rate derivatives (covering both the issue of debt in currency other than the currency used by the issuing company and cash positions that are exposed to exchange rate risk). Lease liabilities are not part of the Consolidated Net Debt. Consolidated Net Debt is a non-IFRS financial measure and should not be considered as an alternative to net income or any other measure of the Group's financial performance calculated in accordance with IFRS. For the definition and reconciliation to the most directly comparable IFRS measure, refer to the Alternative Performance Measures annex of the 2025 Integrated Annual Report.

(2) Fitch Ratings and S&P Global Ratings.

(3) Percentage of fixed gross consolidated debt from ex-infrastructure projects in the total gross consolidated debt as of December 31<sup>st</sup>, 2025.

(4) Liquidity ex infrastructure (Ex-Infrastructure Liquidity) is a non-IFRS measure defined as the sum of the cash and cash equivalents raised from the Company's ex-infrastructure projects, long-term restricted cash, as well as the committed short and long-term credit facilities which remain undrawn by the end of each period (corresponding to credits granted by financial entities which may be drawn by the Company within the terms, amount and other conditions agreed in each contract) and forward hedging cash flows.

Note: Financial figures as of December 31<sup>st</sup>, 2025. See Integrated Annual Report of Ferrovial 2025 for further information.  
 (1) ECP debt was cancelled in January 2026.  
 (2) On January 16, 2025, Ferrovial completed the pricing of an issuance of bonds amounting to €500M, with maturity date on January 16, 2030. The bonds bear interest at a rate of 3.25% per annum payable annually.

On January 16, 2025, the corporate revolving credit facility was refinanced incorporating sustainability criteria linked to KPIs. Final maturity is January 2030 with the possibility of two extensions of 1 year each. Maximum limit of €900M.

## Credit rating agencies' metrics

## NET DEBT/ADJ. EBITDA

Rating Agencies measure their debt ratios looking at the ex-infrastructure projects debt

Rating Agencies' Adj. EBITDA considers Construction Adjusted EBITDA & dividends from infrastructure assets

NET DEBT EX-INFRASTRUCTURE PROJECTS<sup>1</sup>

(Adjusted EBITDA ex-infrastructure projects<sup>2</sup> + dividends from projects<sup>3</sup>)

(1) Net debt ex-infrastructure projects is the net debt corresponding to the Group's other businesses, including its holding companies and other companies that are not considered infrastructure projects. The debt included in this calculation generally has recourse.

(2) Adjusted EBITDA ex-infrastructure projects is a non-IFRS measure defined as the sum of the Adjusted EBITDA (as defined below) from all globally consolidated companies that are not infrastructure project companies. Infrastructure project companies are our subsidiaries and associate companies the activity of which consists of the development of infrastructure projects. Adjusted EBITDA is a non-IFRS measure defined as our net profit/loss for the period excluding profit/loss net of tax from discontinued operations, income tax/expense, share of profits of equity-accounted companies, net financial income/expense, impairment and disposal of fixed assets and charges for fixed asset and right of use of lease depreciation and amortisation.

(3) Dividends from projects is a non-IFRS measure that includes dividends received from companies consolidated under the equity method, interest received on loans granted to companies consolidated under the equity method, as well as dividends received from discontinued operations. In addition, the definition of dividends from projects includes distributions and other payment or receipts received from the infrastructure companies consolidated globally. Hence, dividends from projects are investment returns from infrastructure project companies through dividends and other similar items, comprising (i) interest on subordinated borrowings and participating loans, (ii) repayments of capital, debt and loans, and (iii) loans received from these projects which repayment probability is considered to be remote.

## Cash flows from operating activities ex-infrastructure project companies<sup>1</sup>

Before taxes

€ M

(1) Cash flows from operating activities ex-infrastructure project companies (Before taxes) are part of our Cash Flows excluding infrastructure projects (Ex-Infrastructure Cash Flows), which is a Non-IFRS financial measure. For the definition and reconciliation of the most directly comparable IFRS measure, refer to Alternative Performance Measures of the Ferrovial 2025 Integrated Annual Report. The breakdown of our Ex-Infrastructure Cash Flows for the period 2016-2025 is disclosed in the Excel version of the Investor Presentation available on the Company's website together with this Fact Book.

(2) IFRS 16 Lease payments included in the financial cash flow to align with the IAS 7 criteria since 2023, previously included in the operating cash flow. As the first year of adoption for IFRS 16 was 2019, the information presented in this Investor Presentation for prior historical periods (2019-2022) has been adjusted for comparable purposes.

## Dividends Declared\*

\* Dividends declared include shares delivered + cash

## DIVIDEND PER SHARE

Since 2014, Ferrovial has distributed dividends on a scrip dividend scheme, providing flexibility to shareholders to choose between cash and shares.

Total dividends consists of:

- **Ferrovial Flexible Dividend Program:** allows Ferrovial's shareholders the opportunity to receive their remuneration, at their own discretion, in cash or in shares.
- **Share Buy-back Program:** consisting of the purchase by Ferrovial of its own shares.
- **Cash dividends:** FER has paid interim cash dividends in 2024 and 2025, both against Ferrovial's reserves.

### VISION

Developing and operating infrastructure that is innovative, sustainable and creates value for our stakeholders.

ferrovial

**Our sustainability strategy adds value to our business, by...**

#### **Fostering productivity**

- Improving efficiency and helping to lower operational costs
- Anticipating regulatory trends
- Contributing to attracting and retaining top talent

#### **Strengthening our license to operate**

- Helping communities flourish by delivering essential infrastructure
- Engaging local communities in project development

#### **Meeting customer requirements**

- Fulfilling public procurement requests
- Achieving mandatory qualifications and certifications
- Supporting customer audits

#### **Enabling access to alternative finance**

- Delivering green and sustainable finance frameworks

#### **Contributing to fulfilling shareholders' expectations**

- Supporting investor relations on ESG matters
- Striving to meet analysts' and indexes' expectations

## Driving Positive Impact Through Environment, People and Governance

### Ferrovial's commitments to sustainability

## SUSTAINABILITY

## Commitments to sustainability

Ferrovial strives to minimize its environmental footprint by using resources efficiently, lowering carbon emissions, reducing water use, and limiting waste through operational excellence.

We evaluate severe climate risks to enhance the resilience of our assets in the long-term.

Ferrovial sees new business opportunities in addressing environmental challenges.

Ferrovial develops infrastructure to help communities grow and thrive. We engage local communities to create shared value and mutual success.

We invest in people's growth and well-being by prioritizing health and safety and fostering a culture of belonging, which improves talent attraction and retention, thereby contributing to the company's competitiveness.

Ferrovial manages its business committed to the values of respect, collaboration, excellence, innovation, and integrity, adhering to local regulations and respecting human rights.

By consistently addressing our customers' needs, Ferrovia aims to become a long-term partner.

We innovate to enhance competitiveness, drive progress and deliver sustainable value to our stakeholders.

The logo features the word "ferrovial" in a black, lowercase, sans-serif font, positioned to the left of a yellow graphic element that resembles a stylized train or a curved shape.

| 9. Digitalization & innovation: portfolio that contributes directly and indirectly to improve ESG<br>(% of investment over total portfolio) | 33.7%        | 34.0%        | 60%                  | 2027                  |

(1) Reductions resulting from the exclusion of Allerton facility from the scope (Thalia, UK). Excluding Thalia, the effective reduction would be 25.1%  
 (2) Scope 3: Including purchased and transport of goods and services; waste generated in operations and fuel and energy.

## SUSTAINABILITY

## Environment

SCIENCE  
BASED  
TARGETS  
DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

Emissions reduction targets according to the Science Based Targets initiative (SBTi) for both near-term (2030) and long-term (net zero by 2050 or earlier)

100% renewable electricity consumption annually from 2025 onwards

Deep Decarbonization Pathways (DDP), which establishes the emission-reduction levers

TCFD

TASK FORCE ON  
CLIMATE-RELATED  
FINANCIAL  
DISCLOSURES

Management of risks & opportunities regarding climate change in short, medium and long term

TNFD

Taskforce on Nature-related  
Financial Disclosures

Early adopter of TNFD, seeking to address the crisis of biodiversity loss & ecosystem deterioration

## CLIMATE STRATEGY GOALS

## SBTi-validated targets aligned with 1.5°C

- » Ferrovial was the 1<sup>st</sup> company in its sector worldwide to set emission reduction targets and have these endorsed by SBTi in 2017.
- » Since 2021, the company has committed to the 'Say on Climate' initiative, which involves presenting Ferrovial's Annual Climate Strategy Report at the General Shareholders' Meeting, for advisory voting. In this way, it has become the 1<sup>st</sup> Spanish-origin company to take on this commitment, and the first in its sector globally.
- » In 2025, Ferrovial obtained SBTi-validated targets aligned with a 1.5° pathway. The Company sought to increase the level of ambition of the short-term targets and set the goal of achieving net zero emissions by 2050 or earlier.
- » The targets were approved by the Board of Directors.

### Scope 1 & 2 in absolute terms

| TARGET                              | 2025 vs. 2020                        |

| <b>-42%</b><br>by 2030<br>(vs 2020) | <b>-45.6%</b><br>(2025 TARGET: -21%) |

### Scope 3<sup>1</sup> in absolute terms

| TARGET                              | 2025 vs. 2020                          |
|-------------------------------------|----------------------------------------|
| <b>-25%</b><br>by 2030<br>(vs 2020) | <b>-17.5%</b><br>(2025 TARGET: -12.5%) |

## Ferrovial's 2025 greenhouse gas emissions

## Water footprint

Ferrovial developed a methodology based on internationally recognized standards for the calculation of the water footprint, which enables water management to be carried out at geographical level. This methodology considers the source of water withdrawal, assigning different weights depending on its origin, the country's water stress and the destination of the discharges and their quality according to the treatment they have received.

**-20%**

2030 TARGET<sup>1</sup>  
Reduce water consumption (BWU)

**70x**

annual water footprint compensation (WTI + WAI)  
(WTI + WAI > 70BWU) annually

### POSITIVE CONTRIBUTION

The water treatment activity together with the social action projects help to offset the impact of water consumption and discharges needed and generated by the business units.

## Striving for a risk-free environment

Frequency Rate Evolution<sup>1</sup>

### Management's strong commitment to H&S: High potential events (HiPo)

Any event with the potential to have caused a fatal or catastrophic accident but which ultimately did not and serves as an opportunity for learning.

These events are reported and analyzed by the Management Committee and an executive incident review (EIR) of such events is carried out. As a result, lessons learned can be drawn and actions can be taken.

ferrovial

(1) Frequency rate = number of accidents \*1,000,000/Number of hours worked (excluding contractors)  
(2) SIF Frequency rate (# Serious Injuries and Fatal x 1000000)/# of hours worked). NOTE: the significant variations in the frequency rate are mainly due to the divestment processes undertaken by the company in the last two years.

## Developing people to solve future challenges

### BY AGE

### BY COUNTRY

ferrovial

<sup>(1)</sup> The workforce has decreased from 25,501 in 2024 employees to 22,609 in 2025 during the reporting period. This reduction is primarily explained by the divestment of two subsidiaries: Ferrovial Services Chile and Broadpectrum Chile.

## CORPORATE GOVERNANCE | BOARD MEMBERS

73% of independent non-executive directors

ferrovial

(1) The Board has a vacancy due to the resignation of Ms. Alicia Reyes effective 19 January 2026. The Board has initiated the process of finding a suitable replacement to fill the vacancy.  
 (2) Voting power of the Board is 30.2% counting outstanding shares as of February 10, 2025.  
 (3) Ms. Elisenda Bou-Balust was appointed as a non-executive director at the Shareholders Meeting held on April 9, 2026.

Max. 150%  
of fixed remuneration

LONG TERM INCENTIVE PLANS<sup>1</sup>

Max. 150%  
of fixed remuneration

Max. 150%  
of fixed remuneration

## LONG - TERM VARIABLE REMUNERATION

Executive Directors participate in a long-term variable remuneration system based on share delivery plans, in which other executives and key professionals of the Group also participate.

The units allocated may be converted into shares if (i) Executive Directors remain with the Company for a maturity period of 3 years from the date of allocation of the units, except in exceptional circumstances such as retirement, disability, or death, and (ii) certain objectives linked to internal or external metrics reflecting economic-financial and ESG targets and/or value creation for the Company are met, under the terms approved by the respective Shareholders' Meetings.

LONG-TERM INCENTIVE PLAN<sup>2</sup> (2023-2025 PLAN) - 2025 GRANT

## DISCLAIMER

This Investor Presentation has been produced by Ferrovial N.V. the "Company", "we" or "us" and, together with its subsidiaries, the "Group" for the sole purpose expressed herein. By accessing this Investor Presentation, you acknowledge that you have read and understood the following statements. Neither this Investor Presentation nor any of the information contained herein constitute or form part of, and should not be construed as, an offer to purchase, sale or exchange any security, a solicitation of any offer to purchase, sale or exchange any security, or a recommendation or advice regarding any security of the Company.

In this Investor Presentation, unless otherwise specified, the terms "Ferrovial," the "Company," "we," "us," and the "Group" refer to Ferrovial N.V., individually or together with its consolidated subsidiaries, as the context may require (or, unless stated otherwise, if referring to the period prior to the completion of the cross-border merger on June 16, 2023, to Ferrovial, S.A., the former parent entity of the Group, individually or together with its consolidated subsidiaries, as the context may require).

Neither this Investor Presentation nor the historical performance of the Group's management team or the Group constitutes a guarantee of the future performance of the Company and there can be no assurance that the Group's management team will be successful in implementing the investment strategy of the Group.

### Forward-Looking Statements

This presentation contains forward-looking statements. Any express or implied statements contained in this presentation that are not statements of historical fact may be deemed to be forward-looking statements, including, without limitation, statements regarding estimates and projections provided by the Company and certain other sources with respect to the Company's financial position, business strategy, plans, and objectives of management for future operations, dividends, capital structure, as well as statements that include the words "expect," "aim," "intend," "plan," "believe," "project," "forecast," "estimate," "may," "will," "should," "target," "anticipate" and similar statements of a future or forward-looking nature, or the negative of these terms or other similar expressions, although not all forward-looking statements contain these words. Such statements may reflect various assumptions by the Company concerning anticipated results and are subject to significant business, economic and competitive uncertainties and contingencies, and known and unknown risks, many of which are beyond the Company's control and may be impossible to predict. Any forecast made or contained herein, and actual results, will likely vary and those variations may be material. The Company makes no representation or warranty as to the accuracy or completeness of such statements, expectations, estimates and projections contained in this presentation or that any forecast made or contained herein will be achieved. Risks and uncertainties that could cause actual results to differ include, without limitation: risks related to our diverse geographical operations and business divisions; general economic and political conditions and events and the impact they may have on us, including, but not limited to, impacts on demand or public fund allocation in the industries in which we operate, volatility or increases in inflation rates and rates of interest, exchange rate fluctuations, increased costs and availability of materials, and other ongoing impacts including, from, for example, changes in tariff regimes, the Russia/Ukraine conflict, and the Middle East conflict; our legal and regulatory risks given that we operate in highly regulated environments, and the impact of any changes in governmental laws and regulations, including but not limited to tax regimes or regulations; the fact that our business is derived from a small number of major projects; risks related to government contracting; the impact of competitive pressures in our industries, including on bid success and pricing; risks related to our acquisitions, divestments and other strategic transactions that we may undertake; cyber threats or other technology disruptions; our ability accurately to develop estimates or the impact of changes in our underlying assumptions, with respect to project plans, including project timing and budgets, and our ability to meet contractual expectations with respect thereto; the impacts of accidents, disruptions, or other incidents at our project sites and facilities; our ability to obtain adequate financing or access to capital in the future as needed and the impact of reliance on joint venture and partnership arrangements; our reliance on and ability to locate, select, monitor, and manage subcontractors and service providers; the impact of certain swaps and hedging arrangements we enter into from time to time; limitations on our ability to declare and fund future dividends or other distributions, and distribution processes and timelines; our ability to maintain compliance with the continued listing requirements of Euronext Amsterdam, the Nasdaq Global Select Market and the Spanish Stock Exchanges; lawsuits and other claims by third parties or investigations by various regulatory agencies that we may be subject to; our ability to comply with our ESG commitments or other sustainability demands, including changing or conflicting expectations in connection with sustainability and ESG matters; physical and transitional risks in connection with the impacts of climate change; risks related to the adequacy or existence of our insurance coverage and any non-recoverable losses; and the other important factors discussed under the caption "Risk Factors" in our Annual Report on Form 20-F filed with the U.S. Securities and Exchange Commission ("SEC") for the fiscal year ended December 31, 2025 which is available on the SEC website at [www.sec.gov](http://www.sec.gov), as such factors may be updated from time to time in our other filings with the SEC.

Any forward-looking statements contained in this presentation speak only as of the date hereof and accordingly undue reliance should not be placed on such statements. We disclaim any obligation or undertaking to update or revise any forward-looking statements contained in this presentation, whether as a result of new information, future events or otherwise, other than to the extent required by applicable law. Forward-looking statements in this press release are made pursuant to the safe harbor provisions contained in the U.S. Private Securities Litigation Reform Act of 1995. We intend such forward-looking statements to be covered by relevant safe harbor provisions for forward-looking statements (or their equivalent) of any applicable jurisdiction. In addition, certain industry data and other information contained in this presentation has been derived from industry or other third-party sources. The Company has not undertaken any independent investigation to confirm the accuracy or completeness of such data and information, some of which may be based on estimates and subjective judgments. Accordingly, the Company makes no representation or warranty as to the accuracy or completeness of such data and information. Other than as specified, the information contained in this presentation has not been audited, reviewed or verified by the external auditor of the Group. The information contained herein should therefore be considered as a whole and in conjunction with all the other publicly available information regarding the Group.

### Alternative Performance Measures

In addition to the financial information prepared under the International Financial Reporting Standards ("IFRS"), this Investor Presentation may include certain alternative performance measures ("APMs" or "non-IFRS measures") as defined in the Guidelines on Alternative Performance Measures issued by the European Securities and Markets Authority on 5 October 2015, that differ from financial information presented by the Group in its financial statements and reports containing financial information. The aforementioned non-IFRS measures include "Adjusted EBIT," "Adjusted EBIT Margin," "Adjusted EBITDA," "Adjusted EBITDA Margin," "Comparable or Like-for-Like" ("L/L") Growth, "Order Book," "Consolidated Net Debt," "Cash flows excluding infrastructure projects (Ex-Infrastructure Cash Flow)," "Cash flows from infrastructure projects (Infrastructure Cash Flow)," and "Ex-Infrastructure Liquidity." These non-IFRS measures are designed to complement and should not be considered superior to measures calculated in accordance with IFRS. Although the aforementioned non-IFRS measures are not measures of operating performance, an alternative to cash flows, or a measure of financial position under IFRS, they are used by the Group's management to review operating performance and profitability, for decision-making purposes, and to allocate resources. Moreover, some of these non-IFRS measures, such as "Consolidated Net Debt" are used by the Group's management to explain the evolution of our global indebtedness and to assist our management in making decisions related to our financial structure. Furthermore, it is used by analysts and rating agencies to better understand the indebtedness that has recourse to the Group. Non-IFRS measures presented in this Investor Presentation are being provided for informative purposes only and shall not be construed as investment, financial, or other advice.

The Group believes that there are certain non-IFRS measures, which are used by the Group's management in making financial, operational and planning decisions, which provide useful financial information that should be considered in addition to the financial statements prepared in accordance with the accounting regulations that applies IFRS EU, in assessing its performance. These are consistent with the main indicators used by the community of analysts and investors in the capital markets. However, they do not have any standardized meaning and are therefore unlikely to be comparable to similarly titled measures presented by other companies. They have not been audited, reviewed or verified by the external auditor of the Group. For further details on the definition, explanation on the use, and reconciliation of non-IFRS measures, please see the section on "Alternative performance measures" in Ferrovial S.E.'s Integrated Annual Report (including the Consolidated Financial Statements and Management Report) for the year ended December 31, 2025.

### Additional Information

The Company is subject to the information and reporting requirements of the Securities Exchange Act of 1934, as amended, applicable to foreign private issuers and in accordance therewith is required to file reports and other information with the SEC relating to its business, financial condition, and other matters. The Company's filings can be accessed by visiting EDGAR on the SEC's website at [www.sec.gov](http://www.sec.gov).
